Seems that when you visit it for first time with unused IP number between countdowns is random (I got 7, 2, 1)
Then on all next visits number is always 4 with 12:03:48:44 countdown
And its not that site checks your cookie, cookie doesnt matter. Seems to me that server is making his own list of already used IPs. (cookie is always the same: dps_site_id:"4000")
With each different number between countdowns, countdowns have different time.

Interesting:

https://en.wikipedia.org/wiki/Mojave_phone_booth#Revival_of_the_phone_number

Revival of the phone number
AT&T's PacBell no longer owns the Baker, California +1-760-733-9XXX block of one thousand numbers, having relinquished it to competitive local exchange carrier peerlessnetwork.com on March 28, 2013, as part of a number pooling scheme.[8]

The Mojave phone booth's number, 760-733-9969, was acquired from the CLEC by phone phreak Lucky225 on July 31, 2013 and now rings using voice over IP.[9] Originally, callers joined a conference where strangers could once again connect just like when the phone booth was active.[10] At some point before May 27, 2015, it was reconfigured to play the audio book of "Exploding the Phone" by Phil Lapsley if there were no other people in a given conference. The number does not accept calls from numbers whose caller IDs are blocked or otherwise unobtainable.

IRC over SMS was added for Defcon 22 and is currently still working as well, one can send an SMS with SUBSCRIBE ALIAS to 760-733-9969 to join the group SMS chat.

Edited!?

Since we have nothing else to go on, I'm in for calling the number. As for the paranoia, I felt the same way, but whether by phone or by this post if "they" want to find us I'm sure they already have.

Just a theory on the puzzle and imminent countdown, which seems to echo both literal and non-literal meaning northern California is experiencing a record breaking storm over the next 3 days and to expect flooding and landslides.

For those up here it means the power going out is likely and buying wood is probably a smart investment.

Edited? JC Sat 07 Jan 2017 23:46:52 No.18492474,25 Report Delete

I noticed that too. I didnt pull all that up, but just that it had been edited very recently by anonymous.

Also, as far as calling the number perhaps the corresponding number to the countdown is the number we are supposed to press. Just a thought with nothing else to go on, even though it only goes up to 7.

Timer 7 Jan 25 2017

If you are looking for dates in Jan, 7, 11, 13, 19, 23 and 25, except for the last one, it´s exactly the same as the main page of counters, 7111317192329.com
The last one should be 29 but no, it´s 25.

And 2. Webpage
I get a webpage 7111317192329.html inside website, it´s the same counter, but I get different counter number, not same as 4
http://www.7111317192329.com/7111317192329.html

I think, inside that web server could be another page or image or text file with more clues.

Thoughts?

I'm racking my brain to identify this poem and so far any reference to Shakespeare or his play Macbeth seems to not yield any hit. Maybe this is a contrived poem or heavily steeped in metaphor. Should we maybe concentrate on the music? One other thing - why did this period sounding music suddenly stop at 3:06 position in video? This seems suspiciously relevant.

I don't understand what the connection is with your http://pastebin.com/HEYJWkWF reference. That looks like old metadata from 4-16-2016. How is this significant? Also, besides a 2422 x 2422 PNG photo file, there's an extra 12.4 MB of data embedded in this. I'm telling you we need some Steg software to remove this! And those countdown timers are there to remind you of having limited time to solve key aspects of this puzzle.

Anonymous Posting # 81: To answer how I isolated this extra data, I kind of cheated. Knowing this was a 2422-squared PNG, I created a new one in PSP, copied the old picture into the new one and saved it as a PNG. Normally, this around 4.86 MB (you can try this technique, too to confirm). So - I subtracted 4.86 from the original Skull_PNG and found it heavy to the tune of 12.86 extra MBs. That's my proof!

7 Is sacred
http://www.catb.org/jargon/html/S/sacred.html

7111317192329
2923191713117

7, 11, 13, 17, 19, 23, 29 => 7 numbers

7 + 11 + 13 + 17 + 19 + 23 + 29 = 119
7 * 11 * 13 * 17 * 19 * 23 * 29 = 215656441
7111317192329 * 7 = 49779220346303 ~ 4.977922e+13

Looking it up that's either going to do something but is far more likely to do nothing.

WAR is usually meant in hacker type circles as like suck it and see type stuff. So war dialing: try different phone numbers and try to phreak or otherwise connect to whatever's on the other end until you find a soft target. War driving: go driving around until you find a less secure network connection etc.

WAR MSM obviously refers to going around looking for insecure...

Good one, Another link with dates:
Following lyrics, could be a clue?

Ocean man, take me by the hand, lead me to the land that you understand
Ocean man, the voyage to the corner of the globe is a real trip
Ocean man, the crust of a tan man imbibed by the sand
Soaking up the thirst of the land
Ocean man, can you see through the wonder of amazement at the oberman
Ocean man, the crust is elusive when it casts forth to the childlike man
Ocean man, the sequence of a life form braised in the sand,
Soaking up the thirst of the land
Ocean man, ocean man
Ocean man
Ocean man, take me by the hand, lead me to the land that you understand
Ocean man, the voyage to the corner of the globe is a real trip
Ocean man,…

Something more to go on?

The important thing about Beethoven is that he's less about motive than about the pure relation between notes, so you're going to get a lot of repeating numbers and then numbers that are identically spaced and so on.

Unless this is a leak from whoever is running this, note that corvids aren't just crows, and that words in Sumerian are often much more flexible in meaning that just wolf is also fox (like gold can mean sheep can mean fleece or throat can mean neck can mean river can mean voice). It's unlikely Sumerian is a clue and even if it is it's being used poorly.

Actually scratch TV show, could be a radio play or book or similar. If this is the case that music may just be a piece of music composed by a friend (fairly common for Radio 4) or taken from a catalogue of stock music (also generally quite common). It sounds like a sort of theme tune though. It is a waltz and for piano, violin with orchestral percussion and strings at a couple of points. The last little tune is on a synth. I would say the oldy reader is p close to the mic. It's not the best recording ever, does not sound professional, although the person reading is good.

Also I noticed the "heavy metal" line and wondered if this wasn't like a pun/reebus-like substitution - so lead meant in the sense to lead someone but substituted with the meaning of a metal. When I googled definition of lead I got a suggestion for definition of harlot and a couple of other related bits, suggesting I'm not the first.

I am so impressed by the way all of your minds work, but I felt the need to express that this is not for the faint of heart.

Have you really thought about what happens when you reach the goal or does the excitement of the puzzle override that? I am genuinely curious; there is no judgement here.

Yes, Giordano Bruno was born on Mt. Cicada in 1548, 2012 (first puzzle) - 464 = 1548. There are several relations to Cicada and Bruno that i don't want to get into right now. But he is a major factor. Me and my friend discovered him before anyone else.

There are also Cicada papers (know what i mean?) on his monument. And a picture of his monument is on Cicada's SoundCloud song of Epiphany i think.
And did we all forget about 8 numbers stand between you and the answers?

I found some interesting information about the "object" in the skulls eyes.
And of course, It was explained by Robert Fludd.

It follows with instructions; "Find the numberical value of the Christain name of the person with whom the question is concerned. Then in the table of numerical correspondences find the number corresponding to the day of the week upon which the incident will take place. Also find from an almanac the number of days of the moons age upon the particular day under consideration. Add these sums together and divide by 30. Search for the number remaining in the vertical panel in the center of the weel. If the number appears above the central line, the answer is affirmative; if below, negative".

I came to 7.5, given a miscalc on my end.../

7 which in the Pythag wheel is Mars....

Hopefully this pushes someone, I have tried steg on the original skeleton photo with numerous tools, I can tell something is in there. But cannot extract it so far.

although, if you zoom into the bottom right corner it points the countdown clock url. Which could be the only salvageable clue here.

Until later down the trail they fork over a password to decrypt the PNG.

A Fludd aproches.
Chart the stars.A Chord of would WARMS my I

The three mistakes in this sentence is peculiar.

#1 = approches is missing an “a”
#2 = A space missing between “stars.” and “A”
#3 Missing full stop at end of sentence, making it appear incomplete to continue elsewhere? Since the writer included a full stop after the first sentence there’s no reason for omitting it in the second sentence, thus making it plausible to be intentional.

Inspired by JC’s earlier post on fludd that could represent “flood” and another post about Giordano Bruno, the wiki page on Bruno leads to Mnemonic. These two sentences seem to be constructed from various Mnemonic principles.

If you take Mnemonics, “Chord of wood” makes sense. You can also interpret the meaning of the missing “space” as an actual word: “Space a cord of wood” almost like an instruction to space 128…

Chord is also a computing

I've decided to spend the majority of my time pondering on the audio recording and the text and take the Mnemonic concept as far as I can with it. It does, however, seem to get hairy at stages – consider the below.

A previous poster mentioned the "C Major Chord": The beginning of the phone booth audio starts with "heavy metal" – when juxtaposed with the music, it can be interpreted as Tungsten, which is a heavy metal used to make the the C string of a Cello. I speak under correction but there might be Cellos in the musical part of the recording.

It's to my ear a violin, though I suppose a viola is possible (but unlikely). They do have a section of violins doing a bit of pizzicato a couple of times too, as well as a couple of timpani. The dynamics are pretty flat (so it's not like we ever get a super soft and quiet piano and violin) which is part of why I guess it's for TV or Radio. Although having looked at a couple of possible composer suspects I can't find a good lead. I'm tempted to try to get a lead on it from a TV or radio forum to be honest, I would also guess it's early 90s-ish if that helps anyone. And probably a drama.

100% not a 'cello I'm afraid.

I wouldn't get hung up about the 3301 misspelling a word. Approche is either an Old English spelling as per the days of William "the Bard of Avon" Shakespeare (1564 - 1616) or that of the French spelling. I think it's a deliberate attempt to thwart google-searching. However; the converse is true. It they make a work all caps (like WARMS) it's probably with good intention. Since "Chart the stars" is mentioned - you can bet the solution is astronomical in meaning. I really think WARMS is some as yet undiscovered acronym. Just like MVEMJSUP doesn't immediately jump out at you. Those good at astronomy know this as: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Pluto. The only decent acronym for WARMS is this: Web Automated Reference Material System - which makes zero sense. Incidentally, the mathematical definition of chord is a line connecting two points on a circle's edge. And of course, a cord is 128 cubic feet of firewood comprising (usually) 4 x 4 x 8 feet. As for Robert Fludd (17 Jan 1574 - 8 Sep 1637), he was into the occult. While he followed Paracelsus in his medical views rather than the ancient authorities, he was also a believer that real wisdom was to be found in the writings of natural magicians. His view of these mystical authorities was inclined towards the great mathematicians, and he believed, like Pythagoras and his followers, that numbers contained access to great hidden secrets. Certainty in religion could only be discovered through serious study of numbers and ratios. This later brought Fludd into conflict with Johannes Kepler. Isaac Newton, at this time, also held similar beliefs, focused on the dimensions of Solomon's Temple.

f it could be useful:

In 1617 the English physician Robert Fludd public sull'Utriusque Cosmi (Both Worlds) its own representation of the universe, conceived as an immense monochord tuned directly from the hand of God. In it the ten spheres of the planets manifest Pythagorean harmony of creation through the relationships that exist between the distances of the spheres themselves. The Monochord World In practice, linking the distances of celestial objects from the center of the universe (which according to Fludd coincides with the Earth) you should get the same reports that are located between the distances at which I should press a finger on the rope Monochord divine to get those special musical intervals that we experience as pleasant as "consonants".

Alright peeps: We are running out of time. The message is:

"Welcome to the Mojave. The truth is lost. Find it."

I know a lot around here continue to fail to see that this is all very biblical in nature. Truth is found in numbers. There is Truth in all lies.

All the information in the world is useless with out the Truth to put it all together.

Jesus said: "I am the way and the truth and the life. No one comes to the Father except through me."

That also sounds an awful lot like 3301s credo.

When it says the truth is lost. Find it. They are telling you that Jesus is lost. Find them.

Jesus=Truth

You do not have to subscribe to religion to understand that.

The best way to interpret ALL of this means, that you can sit here solving puzzles all day long and they wont mean anything without the one who can put it all together. Find Jesus or the Truth and you will find the answers you seek.

Anonymous Thu 19 Jan 2017 21:26:22 No.18492474,400 Report Delete

Anonymous Thu 19 Jan 2017 21:34:08 No.18492474,401 Report Delete

Also, epiphany also stands for Jesus as we discovered earlier on in this thread, so you can take any time 3301, which equals 7 by the way, uses the word epiphany in their puzzles and replace it will Jesus.

I had made a post in a group, and this was commented.
I found it interrsting so decided to post it:

So ... knights used to carry the tails of foxes into battle or on long journeys for good luck/fortune. More than that, this is a rather congruent symbolic concept cross-culturally. A line of reasoning could possibly be an allusion to something integral between the spiritual majesty of continuity that a fox represents illustrated as the inherit conflict of thought & memory vs the perception of continuity. Our inability as humans to see this reality. Didn't the Nords depict thought and memory as Hugin and Munin? The other three are the Morrigan would be my guess. This speaks of reliance over the known and a lack of recognition for the unknowns influence as nearly overwhelming and trapping the individual ... and considering that humanity's just changed course of evolution from survival to will ... it is only the will to survive that allows us to thrive.

Question the serendipitous.

I need the original image to see whether the last letter, is "I" (capital i) is not actually "l"(lowercase l). The distinction between I and l is not. I self-studied typography so this was something that jumped out for me.

It could be important or not. Some ciphers place meaningless words or letters at the beginning and end of ciphertexts that can be discarded when deciphering.

By using a screenshot from the video, I concluded that it is a lowercase L and not an uppercase i. However, due to the video quality not being that great, it cannot be concluded. The pixelation is paramount because the difference between suppercase i (I) and lowercase L (I) is 1 pixel.

By the way, when placing transparent versions of all the "message images" from way back, there is a difference in line-height, font-size and weight version of Futura that was used. The ones from the start of the puzzles (the duck decoy ones) all match. All this means to me is that different people created (which doesn't really matter) but at some point they would have had to communicate that the typeface to use is Futura. Or the creator did not care for consistency the second time around.

I'd really appreciate a link to the photo and will post back whether it is an L or i.

I vs L SleepingNebula Sat 21 Jan 2017 09:12:09 No.18492474,445 Report Delete

To me, it is a capital I, not an l. Why? It just makes more sense. I could see somebody decoding all that with numbers and realizing that L actually makes the math work out better or something. But for Cicada, it's all spiritual based, and so I think they would be very over the top to try to trick us with an I vs an L, when the I in the sentence reminds me of the third EYE. I think a lot of yall are looking in e wrong directions sometimes, and get lost into strange details that just don't sound plausible, sometimes. Anyhow, happy hunting.

Anonymous Sat 21 Jan 2017 09:16:53 No.18492474,446 Report Delete

Nope, it's definitely an uppercase i. It is smaller than the l in Fludd, and the l in Fludd is higher than the uppercase F (characteristic of Futura). Sorry about that. Thanks for the image though, it did help me rule out my previous assumption.

I heard trucks, foot traffic, aircraft, and some passing conversations I couldnt make out. I also heard some radio chatter. After around 10 mins of hold music and these in and out audio feeds, I started hearing a lot of backgriund commotion, what sounded like a siren, and radio chatter. The only things I could make out on the radio chatter where "code red" and "containment breach". Followed by more sirens, a lot of static, commotion, and he most worrying of all was the sound of auto matic gunfire. This went on for maybe another 10 minutes or so as I sat confused and slightly worried. It seemed to random and dragged on to be from a movie or tv show, the only thing I could think was a video game or perhaps a real recording from some sort of event.

Sorry for my english. I see there are much more guys intelligent than me. I don know how you extract phone in just one day. But you need to be aware of one thing. Without any doubt this is connected with underground organization that most of us deny to exist anymore. Actually today it is infiltrated in every segment of society than ever. It is neokhabalistic, zoroartrsitic organization with some ancient Egypt roots. Yes, I talk about masonry.

If it is only (i)regular masonry beyond this that is much deeper and darker than you can imagine with health mind.

But it could be worst. In past cicadas, there was hermetic philosophical references and writers such as Blake(not alone almost every famous writer and poet was member of them). But also there was references to Alister Crowley. Someone already noticed that.

You should now him. He re-established para-masonry organizations OTO, Golden Dawn and AA. His statements about mass sacrifice of intelligent male child as perfect victim were not metaphoric at all.

They are not so influenced as classic masonry. But classic masonry(not much better) does not recognize Crowley and does not much will to recruit on this ways.

Both organizations were channel for intelligent services.
Keep in mind that impressions during initiation are so unthinkable unacceptable to normal person that they lead to bi-polar disorder which is caused by strong trauma.

This could be the best possible reason why we dont have feedback of previous solvers. Other reason would be much more scariest.

Outguess Rebirth - Site was contaminated and I couldn't even enter it.
Out Secret - Locked up
iSteg - AV labeled it as Harmful Software
OpenStep - Installed okay but first time it ran it acted really weird and then froze!
Has anyone else bravely tried running steg software on this? And did anyone determine if there is a viable password to extract files from that giant .PNG file?

While I was listening to it there was a double, around 4 khz, double ping that toned about every second.. It sounded like the tones used in the 90's when another call was coming in on an AT&T landline.
I was using VOIP and my incoming tone is different and would have been much louder and immune from signal noise of the other end.
Was this tone present in the past plays of the message? I just found out about this puzzle about 4 hours before the 6th event and read all there was here and on other forums but have missed much.

Morse code surrounding fox & raven pic revealed 1st major message: New Species is Emerging..
I believe the Phonebooth is to connect seekers in conference and it also delivered major clue by way of greeting: the 'Heavy Metal' message recited in Parabols with more strange music that was decyphered to reveal the simple 7 word message, 'the Truth has been Lost. Find it.'

Another brood on YouTube is discussing Odin, three reference stars from Germanic astronomy, and somehow derived the 7 letters 'Orcgwhn' from the clues. (I missed how that was derived). That is just a sequence, in Latin, from the Angle-Saxon Futhorc.
https://github.com/catenate/acme-fonts/blob/master/test/1/acme/Font/runic.txt
That also ties into the YouTube video of the piece of paper with three stars(?) and Runic script.

To find a reference star, I had followed their work and guessed that Fomalhaut would be the one since some attempts at reclaiming Germanic astronomy makes it the plucked eye of Odin laying under the flow of Aquarius and it would be visible in a European Sky on the Winter Solstice for a cord of wood to be burned to Odin's Eye.

I have doubts about the Odin and Runic connections now and think this person's work would be more fruitful in determining a star celestial coordinates.

See what note names there are, see if they match up with anything. The names of the key signatures could spell something out if there have been different songs played during different times. Two of the songs I have identified

1. 'Where is my mind' by the Pixies (was featured in the Movie Fight Club, about a secret group)

https://www.youtube.com/watch?v=-gkibxWr0DY

2. 'Jazz Suite, Waltz No. 2' by Dmitri Shostakovich (featured in Eyes Wide Shut, a movie with many occult interpretations)

https://www.youtube.com/watch?v=5wjnzGwmbqs

The interesting thing about that 'hold music' is that it is not the original studio production versions of those songs, there are little stylistic additions and things like that, so I think it might not just be something in the background. They might contain more.

I put the audio track from the Mojave phone booth music into a software program (the music that starts with the message about 'heavy metal) and it is pretty interesting as well. It is actually 2 tracks, one right on top of the other. Someone online derived at least part of an alphabet from it, maybe that alphabet can be used to crack some of these other songs, but I am trying to figure out how he got his info myself just to see how he did it.

That whole line of thinking may be a red herring though. As far as the original clues, I have been pretty focused on Robert Fludd and some of the original material, it is easy to go down rabbit holes, those first things are the clues that should lead to something.

I posted this earlier, not sure if anyone has looked into it. The Fludd lines:

A Fludd approches.
Chart The Stars. A Chord of would WARMS my I.
I think it can be calculated as either individual (some non-traditional) Roman numerals, or as a Chronogram:
https://en.wikipedia.org/wiki/Chronogram
Here is something about Fludd using chronograms in his writing:
Defence of Rosicrucianism:
Fludd was not a member of the Rosicrucians, as often alleged, but he defended their thoughts as expressed in numerous manifestos and pamphlets Tractatus Theologo-philosophicus, &c., Oppenheim, 1617. The date is given in a chronogram. This treatise "a Rudolfo Otreb Britanno" (where Rudolf Otreb is an anagram of Robert Floud) is dedicated to the Rosicrucian Fraternity. It consists of three books, De Vita, De Morte, and De Resurrectione. In the third book Fludd contends that those filled with the spirit of Christ may rise before his second coming.[12]
That comes from this Wikipedia page:
https://en.wikipedia.org/wiki/Robert_Fludd
The interesting thing about this particular page is that it insists that Fludd was not a Rosicrucian. According to one of the most influential Masonic Historians, Manly P. Hall, Fludd most certainly was a Rosicrucian:
Rosicrucian and Masonic Origins
by Manly P. Hall
From Lectures on Ancient Philosophyâ€"An Introduction to the Study and Application of Rational Procedure:
The Hall Publishing Company, Los Angeles, First Edition 1929, Chapter 19
The smaller group of adepts that had withdrawn from the order remained inactive apparently, having retired to what they termed the “House of the Holy Spirit,” where they were enveloped by certain “mists” impenetrable to the eyes of the profane. Among these reclusive adepts must be included such well-known Rosicrucians as Robert Fludd.

Traditional Roman numerals:
Symbol I V X L C D M
Value 1 5 10 50 100 500 1,000

List of non-traditional numerals used in the Fludd lines (taken from the Medieval roman numerals, to it makes sense for Fludd's time):
Symbol A :
Value - 5 Resembles an upside-down V. (Also said to equal 500.)
Symbol R:
Value - 80
Symbol S:
Value - 7 or 70 (Presumed abbreviation of septem, Latin for 7.)
Symbol - F:
Value - 40 (Presumed abbreviation of English forty.)
Symbol - W:

Value - 5,5 (10?) (was interpreted as two V's side by side, but I am not certain whether that meant 5,5 on its own or represented a value of 10)

"A Fludd approches. Chart the stars. A Chord of would WARMS My I" capital letters produces these Roman numerals:

A F L C A C W A R M S M I

From the Wiki for "monochord" (//emphasis// mine) https://en.wikipedia.org/wiki/Monochord:

"In 1618, Robert Fludd devised a mundane monochord (also celestial or divine monochord) that //linked the Ptolemaic universe to musical intervals.// 'Was it [Mersenne's discoveries through use of the monochord (1637)] physical intuition or a Pythagorean confidence in the importance of small whole numbers? ... It was the latter.'[8]"

The concept of the monochord can be tied to the idea of the musica universalis: the music of the spheres. A Pythagorean idea (https://en.wikipedia.org/wiki/Category:Pythagorean_philosophy -- //Dyad// is also mentioned here, another familiarity), and a part of that philosophy. It can also be thematically tied to the idea of the Great Chain of Being:

http://i.imgur.com/kljgcf8.jpg

Looks familiar!

From https://www.princeton.edu/~his291/Fludd.html:

"Robert Fludd here depicts the correspondence between the Human (the Ape of Nature) and the Universe as the human is held by a Great Chain of Being from the hand of God (inside cloud). Higher levels of being descended from God's Heaven through the sphere of stars and planetary orbs to the sphere of the four elements. Humans were thought to contain essences of all other parts of the universe. Fludd was a proponent of alchemical medicine and the theory of correspondences was important to alchemical notions."

So, we have the Divine or Celestial Monochord here represented, along with ties to alchemy and thereby ultimately the Philosopher's Stone.

I have been percolating on this for a few days, and have barely skimmed the surface of a deep, rich pool. What I post here barely begins to scratch at the deeper implications possible along this line of thought, especially combined with 3301's nudging us toward paying attention to the music.

Oh great, Gematria Primus. And I was considering frequencies of letters, -- what a waste of time!
What exactly is Gematria Primus, I wonder? Where did it come from? (except that "The Gematria Primus was provided by 3301" etc, I mean)

The text message Naruto Thu 26 Jan 2017 06:08:25 No.18492474,683 Report Delete

harpuia Thu 26 Jan 2017 06:26:17 No.18492474,684 Report Delete

Last years puzzle there weren't really any "SMART" ways to solve it, you had letters, subtracted a number to those letters, and you got a new letter.
If you wanted a SMART way I guess you could create your own decypher script that features the Gematria Primus

Anonymous Thu 26 Jan 2017 06:32:04 No.18492474,685 Report Delete

Slightly Different Translation Species X Fri 27 Jan 2017 02:03:53 No.18492474,713 Report Delete

Hey guys. I used the Gematria and had slightly varying results of that "number's tape" posted 1-25-17 on the Clyp site. In case anyone would like it, I have that original recording. Here's my translation: A FLUDD KILLS ALL BUT ROOTS. WOLVES ARE FOXES. FOXES ARE RAVENS. THE HUNT DRAWS NEAR. THOSE WHO CLAEM GOD-HOOD SHXOULD BE STRUCK DOWN BY THOSE DEEMED MRU. WHEN KINGS RISE, TRUMPETS WILL PLAY. THE WORLD IS NOT YET FLOEDED KEEP HUNTING 3301
I could've made mistakes as this was incredibly tedious and labor-intensive. And weird is the extra "X", misspelled "claem" & "floeded", and "MRU" that could also be "ORC" as the Cicada3301 people interpreted. I find it odd there are such errors. Either these were carelessness or an added measure to throw us off the scent, so to speak.

7

The 7 is the mystic and the philosopher, the number of creative, mental activity and spiritual evolution. The 7 relates to cycles of time and the movement of the sun and the planets as seen from Earth. Many vibrational things, such as chakras, colors, and musical notes, come in 7s.

No...Just...no...
Cicada 3301 is a puzzle arg for cryptography enthusiasts.

Adding the air mystery just makes it more attractive for people to solve, like fish bait. Face it, most of you wouldn't care to open your old trig/language/history text books unless you really enjoy it. At least I do anyways, it's a good refresher. Err...anyways.

My grandparents on one side are Zoroastrian, please don't spout B.S. conspiracy theories and lump it with Freemasons and cults. Freemasonry is also a social group for different religions, not a religion itself. So that's bullshit on top of bullshit.

If you really want to solve the whole Cicada 3301 puzzle go back to that liber primus (if it's even meant to be solved) and at least try. All these non PGP puzzles could be fakes to bring out the tinfoil hats and confuse you, or remind you/give hints for the previous puzzle still waiting to be solved two years later.

I would say mission accomplished. Cicada is all about opening your eyes, but those who want to continue putting their hands in their ears and singing lalalala is exactly the kind of people this puzzle has been weeding out.

You are so confident in your beliefs, which is exactly what youre touting. YOUR beliefs. The world is bigger and more complex than your computer. Youre living in an arg, cicada wants to bring you out of it.

Until you can suppress your ego, you will forever be blinded to the Truth.

I've tried to read the uncovering-cicada wiki, but there are huge piles of unstructured information without anything that looks like a starting point.
I like puzzles, and I also love cyphers, and cicada seems to be a lot of fun, but I don't want to get involved in this mess. Where can I get the full versions of the pages, for example? The images at http://cicada3301.org are tiny.

Even in the video it said "She found us. She is here. Shes alive." The data packet is a person and if we dont find her, she will disappear. She being the Truth. She being the data packet.

Please do not become blinded by your enlightenment. It doesnt mean we are any better or we have it all figured out. It is our duty to guide people to the Truth.

1. Orion is located on the celestial equator and visible throughout the world.
2. Orion is best viewed during the month of January. Beginning on Jan. 6th.
3. Orion's Belt has 3 stars lined up in a row that could possibly be a musical chord.
4. Orion is a hunter with wolves.
5. Orion is mentioned in the bible.

Also, NASA is building a spacecraft (targeted for Mars) named Orion.

Any updates regarding this? It's suddenly became quiet. Err. I tried to solve it in a simple way.

"A Fludd approaches." -> first assumed the word "Fludd" was misspelled on purpose and still technically relates to a huge mass of water that cause chaos. BUT I also looked up what other things Fludd could lead to and got this-> http://paulijungunusmundus.eu/synw/pauli_fludd_flood_sync.htm <- It's about the "Return of the World Soul"

"Chart the stars." -> Way-finding; It's how people used to sail the great seas.

"A Chord of would WARMS My I" -> Water gets warmer if you're on the right path

After trying to understand it with my own weird assumptions of what it could mean, I also tried the Gematria. Then I thought that maybe the reason why there were only two periods is because we had to turn them in their corresponding numbers and multiply them.

Came up with 14.8.53
I first looked them up to see any other significant things that could be clues!

1) There was something regarding an astronomical observation.
2) An I.P. Address showed up.
3) 5,963 (product) -> 23 -> 5

5 IS a significant number. There are many things that consider 5 as sacred/mystical.

1) 5 is the number for balance.
2) For Pythagoreans, they believed that it meant "hieros gamos" which translates to "the mariage between heaven and earth".
3) It is the number for the human being.

Well these are just may assumptions. I never really read the earlier parts of this thread. Just wanted to pitch in some ideas that may hopefully shed some light here.

kozaky Mon 13 Feb 2017 05:27:35 No.18492474,830 Report Delete

there isnt any answer. the truth is inside us. as in we need to look inside ourselves. The mojave phone booth wants us o find the truth. the liber primus says to discover the truth inside us. cicada has stopped(not confirmed but looks that way unless someone decodes more of the liber primus or solves the riddle finding out the creators first name.). but the pilgrimage continues.
3301 stated that there would always be a pgp key. no if, and, or buts. no pgp = no 3301.

kozaky Mon 13 Feb 2017 05:38:42 No.18492474,831 Report Delete

the liber primus also states that perservation is a loss to divinty. we try to preserve the thought of cicada 3301. we need to let 3301 go untill it decides to "unearth" itself.

like i said above we just need to find ourselves first before we can find the rest of the "clues". we should study ourselves before we study others.

however, the biggest flaw about the ideals of the liber primus is the liber primus itself. the first sentence says so. "Believe nothing from this book. Except what you know to be true. Test the knowledge. Find your truth. Experience your death. Do not edit or change this book. Or the message contained within. Either the words or their numbers. For all is sacred."

the following sentence "except what you know is true." very little of the book can be proven true. so how can we prove that the text is telling us anything important or of value.

i believe 3301 is still out there but we need to find ourselves first. study the liber primus and decrypt it and do not make up some random correlation.

kozaky Mon 13 Feb 2017 06:42:49 No.18492474,832 Report Delete

so i was looking into the liber primus tonight and came across something a little interesting. under "Know this"(both) sections off all the numberslisted only 4 are prime. 131 151 199 and 809. no connections made yet aboutthose numbers. additionally i looked up the tiolent funtion outputs? for these and they also happen to all be prbime numbers that only have one divisor. 131 become 1131,151 become 1151, and 199 become 1191. coulndt find the value for 809. additionally, 809 is the only number on the bottow set of numbers as well. again no correlation discovered. but maybe someone who is more familliar with numerology of the totient function might be able to inlighten us.

Working with the group on the Mojave Phone Booth chat, one of us received a message from a phone booth in CA (whose coordinates were encoded in an earlier puzzle this year) 818-396-7281. It sent him a message that was a series of beeps and boops; so we ran a spectrogram and there was a link encoded in the song. okay so I have been trying to solve this years cicada, I just didn't read the thread at all. I tried to check the source code of the websites and I found out that in one of the scripts it says ISOGRAM. I honestly don't know if this is just a coincidence but I think it is obvious that it is intentional since isogram means "An isogram (also known as a "nonpattern word") is a logological term for a word or phrase without a repeating letter. It is also used

by some to mean a word or phrase in which each letter appears the same number of times, not necessarily just once. Conveniently, the word itself is an isogram in both senses of the word, making it autological."

well the circle in the skulls head was linked seperatly as a page in a book somewhere around here. we checked what it says in the circle (there are words) it looked like latin so we translated it and it says something like "so let not the wine or the death of my father and whatever else you want to gather by the number of the good:".
Now its just a theory: Number of good - 7 (is secred)
Death of father - i dont remember but in the past clues someone died in one of the 7/11/13/17 of jan maybe we should find who his son is?
other than that i think we should focus on this circle as i didnt see anyone focusing on it as much as on the recordings.

Forty-Six & Two is an idea first conceived by Carl Jung concerning the possibility of reaching a state of evolution where the body would have two more than the normal 46 chromosomes.

Hashole Tue 07 Mar 2017 04:21:55 No.18492474,933 Report Delete

"There are three totally different kinds of humans on the Earth, meaning that they perceive the One reality in three different ways, interpreted differently. The first kind of human has a chromosome composition of 42+2. They comprise a unity consciousness that does not see anything outside themselves as being separate from themselves. To them, there is only one energy - one life, one beingness that moves everywhere. Anything happening anywhere is within them, as well. They are like cells in the body. They are all connected to a single consciousness that moves through all of them. These are (like) the aboriginals in Australia. There might (also) be a few African tribes left like this. Then, there is our level, comprising 44+2 chromosomes. We are a disharmonic level of consciousness that is used as a steppingstone from the 42+2 level to the next level, 46+2...These two additional chromosomes change everything."

Post can be found here of him linking youtube video: http://imgur.com/wPzTDzQ

Youtube video: https://www.youtube.com/watch?v=AukWLdiS6dw

After that post, he then goes to drop another piece of information that giordano bruno is tied into cicada, (Don't remember how giordano bruno was brought up, and the thread is way too big now to look over, so you can go find it if you want).
Anyway, the point is this guy "Rain" was incredibly smart and knew a lot of shit, maybe too much? (Yes, foreshadowing)

well there is a theory that has to do with not the earth being hollow but flat. "We are not of any country" Cicada states to say. So in this theory there is a lot more continents pas Antarctica which the UN has made a pact that no one is allowed to fly over Antarctica and is allowed to go past a certain distance which this pact is real signed by several different country also the continents are supposedly were the Nazis went after WW2 and that is were the 1% are controlling the world. They probably are not aliens but just top level gmen and very special people.

On March 7, 1774, at a second Boston Tea Party, it is claimed that about sixty protesters dressed as Mohawk Indians boarded the ship Fortune, forced the crew below and dumped about 30 one hundred pound chests of tea into the bay. Of this ship's full cargo, 16 chests of fine tea from tea merchants, Davison Newman & Co. Ltd. of London, were among those destroyed.

libra Wed 08 Mar 2017 12:30:35 No.18492474,987 Report Delete

The Act was a response to the Boston Tea Party. King George III's speech of 7 March 1774 charged the colonists with attempting to injure British commerce and subvert the Constitution, and on the 18th Lord North brought in the Port Bill. It outlawed the use of the Port of Boston (by setting up a barricade/blockade) for "landing and discharging, loading or shipping, of goods, wares, and merchandise" until such time as restitution was made to the King's treasury (for customs duty lost) and to the East India Company for damages suffered. In other words, it closed Boston Port to all ships, no matter what business the ship had. It also provided that Massachusetts Colony's seat of government should be moved to Salem and Marblehead made a port of entry. The Act was to take effect on June 1.

Heck remember that these discussions have said.
Maybe we toccocato, perhaps unintentionally, something very big.
Perhaps CICADA is used to convey something very important and secret.
I was afraid the claim that we must be careful.
Maybe between us there is really someone bigger than us.
What precautions do you think we have to take?
Let's keep informed, if it is possible if something strange is happening to us

To you all. I think the link I gave earlier (here I repeat: http://pastebin.com/C7wW5bX1) is very important.
The document appears to clarify and say what CICADA 3301.
It seems to be really a game at the same time encourage the culture of those who participate.
Everything seems to want to create something new and good for all of us.
I suggest you read it and more then we exchange opinions.

TBH for all i know it could be a troll. Ofc someone had put a lot of time into this just like cicada, but i dont know about any actions IRL that this group took to back up their position as a "strong" or "independent" group off people. I might be wrong, so dont take my words for sure and i hope that more people here will see what you shared and give their opinions as well. we can try to solve it as well but i dont have time to do it so if something comes up update me.

The date is the first 3 primes they listed in reverse - today. perhaps the missing 3 primes at the start are the time in reverse: 5:32. I'm not sure what the remaining primes are: 17 19 23 29, but could be:

Q sub i?
17 sub 9?
9 bus 17?

The Illuminati "false flag" prediction for today was flood caused from a missile from submarine on Seattle. Lots of numerical analysis and movie/commercial analysis on YT - search false flag Seattle 3/11.

A chord warms my i.
McChord afb?

FYI - Zoroaster (foundation of world religions) somehow got connected to aliens, possibly by the Chariots of the Gods/Ancient Alien analyses. I think that's why you always end up with aliens when you get into occult. See Wikipedia. We got a mix of astronomy/astrology, and "magic" vs. "sorcery" somewhere along the way.

cicada cycle is prime 13 or 17 years. prime factorization of 7777777 = 7 * 239 *4649
7*11*13*17*19*23*29/7777777 = 27.72 if it helps. Also, Strong's lexiconcordance for 7 is "god is perfect" or "to perish", depending on greek or hebrew. 239 is Alleluia and 4649 is spy, I think. Thought I saw one or the other of 2 factors meaning protector or bringer of truth, but I'm not sure now. Also, there are factorization wheel algorithms on the internet. Entering consecutive primes into the lexiconcordance can get a tad creepy, but not necessarily helpful. Seems some ambitious person might wanna investigate Fludd Monochord harmonics to see if you can find ratios for an algorithm to decipher other codes - it may or may not be helpful. Is there a more recent place to post?

For people getting freaked, the word Occult means "hidden meanings". Free Masonry just comes from the "sacred" geometry which is the 64-tetrahedron, where you will find the triangles, star of david, pentagram, 5 pt star, upside-down star, the pine cone (pineal), pyramid, tetrahedron, the first pic from cicada with the 7 stacked 7s. Illuminati appears to me to be a "deception" using the sacred geometry to perform a "mind trick"- man-made disasters that appear to be real, etc. That's why CIA jumps to mind.

Anonymous Mon 13 Mar 2017 05:33:14 No.18492474,1054 Report Delete

S.L. - there are a lot of illuminati predictions for disasters this week. I was 99.9% convinced they were going to shoot a missile at Seattle yesterday, but I'm a mere human. Mind Tricks. They are certainly at least being suggested if not downright intended. But there's a lot of BS on the Internet, too.

Think about it.
The reference to 1774 (rebellion)
"Not of this or any country" (whatever the quote is) sounds like a reference to aliens (immigrants/ specifically displaced refugees)
Then the random religious tie ins saying we should work together and find the truth.

But that of 3301 should not be a proclamation of politics and religion, from the way they did until now.
So no I consider it a proper way.
Probably 3301 is telling us something with the new countdown.
If it is as you say, I think that someone is experiencing of something serious is going on.
Others what they think?

I believe this may refer to the consequences of a possible victory of Marine Le Pen in France after the next presidential election that will take place in May, maybe? That may lead to France leaving the EU and therefore to EU's end, possibly. Just a - quite groundless - thought.

Hello guys, unfortunately when you were working on this I was asleep. I read it all and I agree with what you said. Only one thing comes to my mind. The Institute is linked to the constellations that is mentioned in the first posts, but consider this. If I'm not mistaken in Europe ursa corresponds to the former USSR and the lion is not England. Maybe I said the wrong things but maybe it can be useful in the analysis.

The garden of Europe is by definition Italy. In Italy there is the Vatican, the Pope is the sloth (the Vatican is always slow in dcecisioni if modern and against the church).
It could be a warning to an attack on the pope in May.
If you remember May 13, 1981 at 17:17 there was the attempt on John Paul II could be the memory and therefore "remember the future."

"I will pour out my Spirit ..." it refers to Acts 2.14 to 24, and Joel 3,1-5.
While "The sun will come back in the darkness, and the moon - blood" refers Acts 2.17 to 21, and Joel 2.28 to 32.

Furthermore, "The sun will come back in the darkness, and the moon - the blood" is related to the total eclipse of the moon (because the moon appears to be blood red).
The vDate the upcoming lunar eclipses are:

partial 08/07/2017

Oldskool Sun 19 Mar 2017 00:24:56 No.18492474,1385 Report Delete

The clock hands are simple. They refer to a coded message that says "Remember the future". Also look at this link. Remember the future was a progressive rock album by Nektar. Also in reference to A chord of would WARMS my I. Look at the album cover. Are the Cicada's buzzing around. Also there is an eye in the centre of the image. And funnily enough, Nektars first album was called Journey to the of the eye". Here is the link

Anonymous Sun 19 Mar 2017 12:33:31 No.18492474,1391 Report Delete

the clock hands on the website were decoded using the one and only true decrypting method: guessing.
there is a three letter word in the middle, that could be "the" "and" ... and so on.
someone went with "the" and then had -E-E--E- THE --T--E guessing the other letters then was quite easy, since the numbers are REMEMBER THE FUTURE in gematria primus

Anonymous Sun 19 Mar 2017 19:24:49 No.18492474,1392 Report Delete

I understand the way that they were found. but the symbols "clocks" were never understood. new clue has same symbols and we don't understand them. that's why I think they were supposed to be understood with another cipher as well. remember the future was given to us as we already had gemetria

Also:

in the desert he knows our circumfrence
I shed so many tears, there is a mant around your heart
for some the pilgrimage begins
for some it continues
in the desert seekers dwell,
in the desert something whispers

I am assuming that this is talking about the phone in the mojave desert. The phone number for that is 760-733-9969

https://en.wikipedia.org/wiki/Circumference

So, if you assume that the phone number is the "circumfrence", and in geometry pi=C/d (circumfrence, divided by diameter equals pi) then dividing the mojave phone number by pi gives me:

2421408781.551389

Someone might want to double check all this, I am not a whiz at geometry or anything. Also, looking at the circumfrence diagram on that wiki page reminds me of the clockfaces from the 3301 website.

Comrades, a humble theory: could this entire thing be a metaphor, could we be looking at this the wrong way - as a literal deciphering instead of a hint at something perhaps unbelievable but much greater - the possibility none of us even want to mention? I read a theory that the story of the apple in the garden of Eden was a metaphor for the encoding of our knowledge - what cognitive science terms cognitive endowment. This

endowment/conceptual framework causes us to impose order and continuity on the world, just like the god Apollo - in metaphysics, we would differentiate things into space and time (hence the clock), meaning those divisions don't really exist. What really exists is chaos - like the inebriated god Dionysus. Dionysus comes across most strongly in formless arts like music. If everything is continuous and chaotic, instead of ordered and linear, maybe we can literally remember the future and maybe music is central to that, seeing that sound - according to many myths - brought the universe into existence.

I think it is interesting to note, that the genome sequence in amessageoftruth.fasta is that of Candidatus Hodgkinia

Species: Hodgkinia cicadicola (strain Dsem)

Species code: HODCD
Taxonomy: Bacteria; Proteobacteria; Alphaproteobacteria; Rhizobiales; Candidatus Hodgkinia (TaxID: 573234) [NEWT/ NCBI]
Description: Candidatus Hodgkinia cicadicola Dsem is newly discovered bacterial symbiont of the cicada Diceroprocta semicincta. At 144 kb it is (currently, July 2009) the smallest known bacterial genome. Like other endosymbiotic genomes it has unusual cell morphology (large and irregularly shaped cells), a high coding density and shortened open reading frames; however it is also unusual in having a high GC content of 58%. It also seems to use an alternative genetic code (UGA Stop to Trp; NCBI genetic code 4). It is suggested to be part of the Rhizobiales (adapted from PMID 19609354). Cicadas have another symbiont, Sulcia muelleri. The metabolic capabilities of Hodgkinia and Sulcia are complementary in that Sulcia is primarily responsible for amino acid biosynthesis whereas Hodgkinia is devoted to cofactor and vitamin synthesis (adapted from PMID 19706397).
Properties: Presence of flagella: not known
Human pathogen: No
Interaction: Animal endosymbiont in Diceroprocta semicincta (cicada)
Number of membranes: 2

I feel the alberti cipher on the sevens.exposed webpage is meant to be used in conjunction with alittlehelp.pdf hidden in the webpage source code. and that the hidden message in cicada3301.org, is meant to be deciphered in this fashion. I could be wrong, we could decrypt using the Alberti Cipher, to move that Alberti Cipher. I have not come accross, any runes in any of the puzzles as of yet, other than on the alberti cipher on the sevens.exposed webpage.

I'm from Brazil and I'm using google translator, so forgive me if there are errors. Some time a boy from here, no Acre has disappeared. He leaves like walls without room the breaks of messages to be encrypted and on one of the walls there is an image of the cicada, He also left a dozen books to encrypt and there are no vestiges of the boy. I believe he has been recruited.
Some time ago, I saw a message from someone saying that it was from Brazil and that I wanted to share the image of the eye in the skull, which I found strange because I thought that no Brazilian was aware of the new puzzle of this year ..
Well, I do not know if this information is useful. I hope I have helped someone.
Good luck.

Has anyone deciphered the DNA yet? That one shouldnt be too hard. Once you figure out the direction of the reading frame (youd probably have to try it out both ways), find the start codon, and start writing out the single letter corresponding amino acid till you get the stop codon. Could give you a word, or even multiple words if there are multiple start/stop codons. If no one has done this yet, I might be able to take a crack at it.

The bottom photo is from ottoman empire and the dancing people there are called "zenne" who are homosexuals. Also the bottom photo is from the era of ottoman empire called "Lale Devri". At that era people were poor and not being taken care of by their goverment and the goverment, top people were happy and rich. The era tried some new improvements to the empire but they were useless. So I think Lale refers to this era.

it could be same refer to overlapping in text/music

this I think is not probably connection at all but for picture of comet- I think nazi used sign swastika had hermetic connection linked to madam Blavatsky and thul society... And in Carl Sagan book COMET that signed is described as prehistoric near earth comet which could be seen by all civilization of thaht time....

... just maybe, CICADA is connected with wikileaks v.ault 7 ....but after first release of wikileak it is contaminated channel and can be use for purposes of agencies not against them...

but for surely this is not just recruting tool rather pokemon for those inteligent ones who can make troubles to Them...

not just maybe, rather probbably this is inked to secret agencies ....

...and because of hermetic refferencies 100 per cent connected with luceferians societys freemasons(or OTO).... which could just tool of agencies... I hope it is not vice versa
